### Description

The BYD Seal Performance is the dynamic model of BYD's electric lineup, offering excellent driving performance, a refined interior, and a modern infotainment system. Its fastback body gives a sporty look and aerodynamic benefits while remaining practical as a family car

### Drive and Performance

- Drive is either rear-wheel drive or all-wheel drive depending on the variant
- Power is around 280–380 kW, higher in the Performance version
- Torque is approximately 600–680 Nm
- Acceleration from 0–100 km/h is roughly 3.8–4.5 seconds in the Performance model
- Top speed is around 200–230 km/h
- The Performance version delivers sporty acceleration and lively responsiveness, competitive with other sporty electric cars

### Battery and Range

- Battery type is high-capacity lithium-iron-phosphate (LFP)
- Capacity ranges from roughly 61 to 83 kWh depending on the version
- Range WLTP is about 460–550 km
- DC fast charging supports around 150–180 kW, 10–80% charge in 30–45 minutes
- AC home charging up to 11 kW
- The battery and range are suitable for full-day use or longer trips

### Dimensions and Interior

- Length is around 4900–4920 mm
- Width is about 1890–1920 mm
- Height is roughly 1450–1470 mm
- Wheelbase is approximately 2900–2920 mm
- Seating for 5 passengers
- Fastback design provides a spacious trunk
- The fastback shape combines sporty style with practical space for passengers and luggage

## Interior Features and Technology

- Large central touchscreen
- Digital instrument cluster
- Wireless Apple CarPlay and Android Auto
- Premium sound system
- Dual-zone automatic climate control
- Comfortable seats with heating and ventilation options
- Keyless start
- Touchscreen control for comfort and infotainment
- The interior is modern, comfortable, and technology-focused

## Safety and Driver Assistance

- Multiple airbags
- ABS and ESP stability control
- Adaptive cruise control
- Lane departure warning
- Parking sensors and camera
- Blind spot monitoring
- Automatic emergency braking
- The Seal Performance offers high-level safety and driver assistance for city and highway driving

## Driving Experience

- Sporty acceleration and dynamic handling
- Immediate torque from the electric powertrain
- Low center of gravity and good road stability
- Quiet, smooth ride in city or open roads
- The Performance model's sporty behavior provides both fun and confident driving

## Summary

The BYD Seal Performance is a dynamic electric sedan that delivers high performance and sporty acceleration, long range, spacious modern interior, advanced infotainment and driver-assistance features, and a stylish fastback shape with practical usability. It is an ideal choice for those seeking a sporty, modern, and practical electric car with long range and advanced equipment.
