Description

What is the AMG ONE?

The Mercedes-AMG ONE is a limited-production hypercar designed to bring Formula 1 technology to road driving. This model was developed by AMG in collaboration with engineers from the Mercedes-AMG Petronas F1 Team

Drivetrain and Performance

The powertrain is highly complex and state-of-the-art:

F1-inspired 1.6-liter V6 turbo engine, directly driving the rear wheels

Three electric motors (two at the front + one connected to the internal combustion engine)

Total system output: approx. 1,000+ hp

Acceleration (0–100 km/h): ~2.5 seconds

Top speed: over 350 km/h

Drivetrain: all-wheel drive (AWD) thanks to the electric motors

The combined output of the ICE and electric motors delivers performance far beyond most conventional sports cars

Engine and Technology

Internal combustion engine:

1.6-liter V6 turbo engine

Direct descendant of Formula 1 power units

Highly efficient and powerful even at high RPMs

Electric motors:

1 motor paired with the ICE (on the crankshaft)

2 motors on the front wheels

This setup enables true AWD and electric-assisted acceleration at low speeds

Aerodynamics and Chassis

Active aerodynamics with adjustable front splitter and rear wing

Carbon-composite chassis for minimal weight

Active suspension control, automatically adjusting damping and ride height

Large carbon-ceramic brakes

Interior and Features

Race-inspired interior:

Racing seats with strong lateral support

Multifunction steering wheel with paddle shifters

Digital instrument cluster with integrated telemetry

Minimalist, functional design with a race car feel

Dimensions and Key Specs

Length: approx. 4,710 mm

Width: approx. 2,000 mm

Height: approx. 1,030 mm

Wheelbase: long for stable handling

Curb weight: relatively low due to composite materials

Driving Experience

Extreme acceleration delivering a true racing experience on public roads

Refined aerodynamic package ensuring stability at very high speeds

Adaptive suspension and ESP control to manage the immense power

Hybrid drivetrain combining a potent gasoline engine with electric motors for maximum performance utilization

Declaration

- **Manufacturer:** Mercedes-Benz
- **Manufacturer headoffice:** Stuttgart, Németország
- **Netto weight:** 1.7 kg
- **Brutto weight:** 1.73 kg
- **Brand:** Mercedes-Benz

Specification

- **Width:** 218
- **Length:** 476
- **Height:** 115
- **Üzemanyag:** Benzin
- **Gépkocsitípusok:** Cabriolet és Roadster
- **Door:** 2/3
