Description

Overview

The Mercedes-Benz EQC is the German premium automaker's first fully electric SUV, sharing a similar size and shape with the GLC but operating entirely on an electric drivetrain. This vehicle is designed for those who want a larger SUV with quiet, low-vibration electric driving while maintaining Mercedes-level comfort and equipment, along with Mercedes Assistance

Drivetrain and Performance

Drivetrain: dual-motor all-wheel drive (4MATIC)

Power: approx. 300 kW / 408 hp

Torque: approx. 760 Nm

Acceleration (0–100 km/h): approx. 5.1 s

Top speed: ~180 km/h (electronically limited)

The dual motors provide all-wheel drive, quick response, and strong acceleration for an SUV-sized vehicle

Battery, Range, and Charging

Battery capacity: ~85 kWh gross (usable approx. 80 kWh)

WLTP range: approx. 412–432 km

Energy consumption: approx. 20.1–21.5 kWh/100 km

DC fast charging: up to 110 kW (10–80% in approx. 40 minutes)

AC home charging: up to 11 kW (full charge in approx. 7–8 hours)

The EQC's range is average among today's electric SUVs, sufficient for both city and highway driving

Dimensions and Practical Details

Length: approx. 4,762–4,774 mm

Width: approx. 1,884–1,923 mm

Height: approx. 1,622–1,625 mm

Wheelbase: approx. 2,873 mm

Seating: 5 passengers

Trunk capacity: approx. 500 liters (up to ~1,460 liters with seats folded)

Curb weight: approx. 2,420–2,495 kg

The size and interior space place it in the mid-size SUV category, offering a roomy cabin and practical

cargo space

Interior Features and Technology

Mercedes-Benz MBUX infotainment system with large touchscreens

Two 10.25" displays (instrument cluster + central screen)

Voice control ("Hey Mercedes")

Apple CarPlay and Android Auto compatibility

Dual-zone automatic climate control

Premium materials and good sound insulation

The interior is both clean and technology-oriented, providing comfort for longer journeys

Safety and Driver Assistance

Multiple airbags

ABS and electronic stability control

Lane keeping and adaptive cruise control

Automatic emergency braking

Parking sensors and camera

The Mercedes-level safety package supports driving in all conditions

Summary

The Mercedes-Benz EQC is a high-quality electric SUV that:

Combines the quiet, low-vibration nature of electric driving with SUV practicality

Provides strong performance and 4MATIC all-wheel drive

Offers around 400+ km WLTP range

Features a spacious cabin and modern infotainment

Comes with reliable, premium equipment

It is particularly appealing to those seeking Mercedes-level premium and SUV comfort with electric power
