

Mercedes Vision EQXX

The Mercedes Vision EQXX is an experimental all-electric concept car that showcases Mercedes' vision for ultra-efficient, long-range electric mobility. Designed with extreme aerodynamics, lightweight construction, and cutting-edge battery technology, it demonstrates the potential of sustainable performance and futuristic innovation.

Product code: mb-vision-eqxx

Brand: Mercedes-Benz

78 523.0 EUR

Netto price: 65 435.8 EUR

Description

The Vision EQXX is Mercedes-Benz's most advanced concept to date, focused on pushing the limits of electric efficiency and sustainability. Its lightweight carbon fiber and aluminum construction, combined with a highly optimized aerodynamic body, reduces drag and energy consumption. The vehicle features a next-generation battery capable of over 1,000 kilometers of range on a single charge, coupled with an intelligent energy management system. Inside, the cabin emphasizes minimalism, futuristic design, and high-tech materials, with screens and interfaces powered by highly efficient electronics. The Vision EQXX is a statement of what the future of electric driving could be—long-range, sustainable, and uncompromisingly innovative.

Specification

- **Üzemanyag:** Plug-in-hybrid
- **Gépkocsitípusok:** Cabriolet és Roadster
- **Door:** 2/3
